PROFESSIONAL SUMMARY

Senior SDET / Test Automation Engineer with 8+ years of experience building and scaling automation for enterprise SaaS and distributed systems across financial services, pharmaceuticals, and threat intelligence. Specialized in Playwright/TypeScript, UI and API automation, CI/CD quality gates, and Selenium-to-Playwright migration.

Proven record of reducing flakiness, shortening feedback cycles, and increasing regression coverage. Experienced in data validation, AI-assisted engineering, and risk-aware quality practices, with a background in business and commercial law that supports work in regulated environments.

CORE SKILLS

Playwright (TypeScript) • UI & API Automation • REST/GraphQL • SQL

Test Automation Architecture • CI/CD Quality Gates • Selenium-to-Playwright Migration

Distributed Systems • Microservices • SaaS Platforms • Log/Trace Analysis • System Reliability

Test Strategy • BDD (Gherkin/Cucumber) • Data Validation • DORA Compliance Testing

TECH STACK

Automation & Code: Playwright • Selenium • Cypress • pytest • TypeScript • JavaScript • Python • SQL

API & Data: REST • GraphQL • Postman • Bruno • Swagger/OpenAPI • PostgreSQL • MySQL • DBBeaver

CI/CD & Cloud: Azure DevOps • GitHub Actions • GitLab CI/CD • Jenkins • Docker • AWS (QA)

Diagnostics & Reporting: Playwright Trace Viewer • Allure • Browser DevTools / Network Analysis • AWS CloudWatch Logs

AI Tools: GitHub Copilot • Claude • ChatGPT • Microsoft Copilot

PROFESSIONAL EXPERIENCE

EPAM Systems | Senior Software Test Automation Engineer

Nov 2024 – Present

Pharmaceutical (regulated) and retail e-commerce enterprise platforms

- Designed and built a Playwright/TypeScript framework covering ~80% of regression across distributed microservices.
- Reduced CI feedback time by ~35% through parallel execution in Azure DevOps pipelines.
- Diagnosed failures across UI, API, application logs, and database state using Playwright Trace Viewer, AWS-hosted test artifacts (traces, videos, reports), CloudWatch logs, and SQL validation; reported defects with the failing layer identified.
- Authored business-readable BDD scenarios in Gherkin, aligning automated coverage with PO/BA requirements.
- Accelerated test authoring by ~40% using GitHub Copilot and Claude while retaining engineering review.
- Validated data integrity for 100+ critical business flows using PostgreSQL/MySQL queries in DBBeaver.

N-iX | Senior QA Automation Engineer

Apr 2022 – Oct 2024

Threat intelligence SaaS platform

- Led migration from Selenium to Playwright/TypeScript, prioritized by business risk, stability, and execution value.
- Built a scalable UI/API automation framework for CI-driven regression coverage.
- Structured suites into smoke, critical-path, and scheduled regression runs; replaced fixed waits with state-based synchronization.
- Reduced test flakiness from ~30% to below 5% through framework stabilization and improved test isolation.
- Maintained a CI pass rate above 95% and reduced manual regression effort by ~60%.
- Evaluated Cypress/TypeScript during stack assessment and supported automation-tooling decisions.

4Team – SyncGene Project | QA Test Lead

Oct 2021 – Apr 2022

Cross-platform synchronization product (web & desktop)

- Led QA and defined test strategy across web and desktop, including compatibility coverage across supported platforms and versions.
- Worked as a B2B contractor and relocated to Slovakia during the engagement.

Dev.Pro | Automation QA Engineer

Sep 2020 – Sep 2021

Financial services / payments platform

- Built a Selenium/Python automation framework.
- Increased automation coverage by ~40%.
- Reduced the regression cycle from ~3 days to less than one day.

Independent QA / Upskilling | QA & Automation

Jan 2018 – Sep 2020

- Delivered QA for SaaS platforms, including SQL-based data validation.
- Transitioned into test automation through hands-on Selenium and Python development.

ACADEMIC & LEGAL BACKGROUND

Yaroslav Mudryi National Law University | Commercial Law

2005 – 2020

Assistant Professor (2005–2011) · Associate Professor (2011–2020)

- Taught commercial and corporate law and conducted legal research as core faculty.
- Published academic research on the legal regulation of blockchain and cryptocurrencies.
- Additionally contributed to course materials for the “International Aspects of Corporate Law and Governance” program through an academic collaboration with the University of Hertfordshire (2008–2009).

EDUCATION & CERTIFICATIONS

ISTQB Certified Tester – Foundation Level (CTFL), 2021

EPAM AI-Assisted Development Training, 2024–2025

Software Testing Diploma – IT STEP Academy, 2018

PhD in Business Law, 2008 · Commercial / Corporate Law

Master's Degree in Legal Sciences, 2002

LANGUAGES

English – Advanced (C1) · Ukrainian – Native · Russian – Native · Slovak – B1 (Conversational)
